

The Challenge

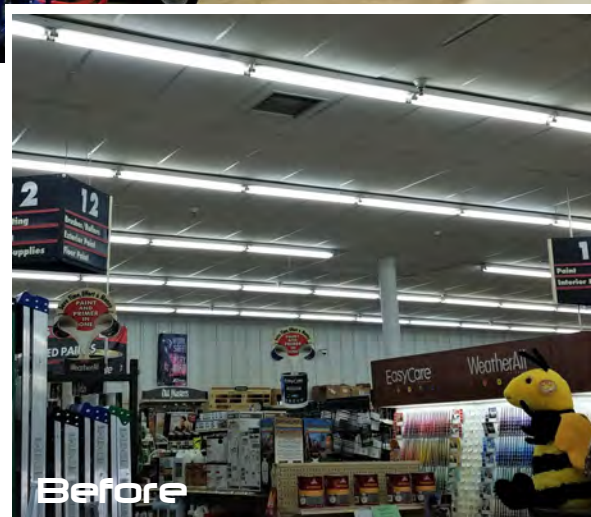

The local True Value in Grand Junction, Colorado has a family style atmosphere and is beloved by its residents. Upgrading to energy efficient LED lighting for owner Cathy Frederick stemmed from her community focus to improve the quality of her retail space. The existing old fluorescent fixtures were sucking up energy, increasing maintenance costs, and causing safety concerns for employees.

The Solution

The new LEDs create a safer working environment for employees and customers, increase light levels with a bright white color while eliminating all dark areas, and cut down on energy usage by 60%.

"I highly recommend LED Supply Co. for your lighting retrofit. The company and their install crew went above and beyond to fulfill all their promises and then some...and the new lighting is FANTASTIC!"

- Cathy Frederick, Owner Peach Tree True Value, Grand Junction CO
